

#549 Kill Parasites You Can't Test for + Kill Them With RIFE with Todd Measles

Dr. Wendy Myers

Hello everyone. I'm Dr. Wendy Myers. Welcome to the Myers Detox podcast. On this show, we talk about everything related to heavy metal and chemical detox health issues that are caused by these toxins. We talk about bioenergetics, anti-aging, and so much more. Today, I have my brother on the show, Todd Measles, and we're going to talk to you about how we got reunited and our whole story. It's really interesting.

When I met him, he was cotton farming in North Texas, and we're going to get into kind of how he got interested in bioenergetics using NES Health software that I'm a huge fan of, and using [Spooky2 rife](#). We're going to discuss what those are and how they can help you and also how Spooky2 rife detects parasites, even ones that you can't test for on conventional medical tests and functional medical tests. There are thousands of parasites, but when you do a parasite panel, you are only testing a handful. How do you address parasites in your body when you can't even test for them?

That's a big issue because everybody has parasites, and they need to be addressed and just taking wormwood or doing a parasite cleanse just, frankly, makes me gag. I've only been able to tolerate doing it a handful of times, and I thought, I think I'll just take the parasites. I have an amazing tool that I found called the Spooky2 rife that is unbelievable at detecting and killing parasites and only the parasites. It doesn't

touch anything else in your body. It's really, really amazing, so stay tuned for a fantastic show.

My brother, Todd Measles, used to be a cotton farmer and now he is a NES Health practitioner and Spooky2 rifle expert. He takes clients remotely and in person in St. Petersburg, Texas, which is near Lubbock, North Texas. He is available for consults. You can contact him at todd.measles@myersdetox.com. Todd, thank you so much for coming on the show.

Todd Measles

You're welcome. It's really great to see you, Wendy, my sister, by blood.

Dr. Wendy Myers

I wanted to introduce you to my audience, and I've told your story before. We had a really interesting way of coming into each other's lives. We'll get to that in a second, but I also wanted to talk about your kind of getting into healing and helping clients. Why don't you just tell us a little bit about yourself and we'll talk about our story, how we met you.

Todd Measles

Okay, well, I was adopted by a family in West Texas. I grew up ranching and farming. I was a soldier for a while and then went to college and got a degree. I spent about 20 years in IT, and then I came back home, and I've done a lot of things since then. But pretty much the most rewarding thing that I've done has been in the last four years now. And that's with the bioenergetics, just helping people. It's awesome.

Dr. Wendy Myers

And you started with [NES Health Bioenergetics](#), which is a software program.

Todd Measles

I did, and that has definitely helped people. I can give you a short story. I had a five-year-old kid come in. His mother brought him in. I couldn't even do a scan because he was so wild, and his mother couldn't make him sit still, and he would beat on her like this. And then, the last time I saw him, he backed off and spit on her.

And so now I'm thinking spiritual deliverance, right? We did two bottles of ESR over two months. Now that kid can go to school. Now he's in the children's church choir, and that's all we did. I didn't even do a NES Scan.

Dr. Wendy Myers

Yeah, and the ESR is an infoceutical. It's a liquid remedy called emotional stress release, yes?

Todd Measles

Right.

Dr. Wendy Myers

Yeah, that a lot of us need.

Todd Measles

Yes, absolutely.

Dr. Wendy Myers

I thought it was really interesting that where you live in North Texas, there's a population of Mennonites there that were your kind of main clientele doing NES healthcare. Can you talk about that and why they're so interested in NES?

Todd Measles

They're really into natural health. I mean, these people are amazing. They are very good at money. They're very good at farming. They're very good at construction. And they really believe in the natural way of health. And so there's a niche there where we've been able to go down there and do the energy work and have helped quite a few people now.

Dr. Wendy Myers:

Do you have any stories? I know the Mennonites are not into conventional medicine or medications or anything like that. They just want to do everything naturally. I thought it was really interesting that all of your clients were Mennonites for years.

Todd Measles

Yeah, I mean, they'll get two or three women together, and they'll process a hundred chickens in a day, all-natural that they fed out. They'll do the same thing with beef. It's really amazing. They are into natural herbs and essential oils. They will seek traditional health care if they need it, but that is not their first choice.

Dr. Wendy Myers

Any stories of healing and recovery? Any testimonies?

Todd Measles

A lot of emotional healing has happened with NES Health and the infoceuticals that we can use. You can watch over a few months as they do the drops and just people coming out of their shells. That's pretty amazing. And getting to a point where they want to if they were in a really low place, they get to a point where they want to improve themselves and improve their lives and start making healthy decisions for themselves.

Dr. Wendy Myers

And that's the beauty of NES. I feel like NES Health is a bioenergetic software. You do a scan and do remedies that are chosen by the software and the practitioner. And it's really amazing too, and with myself as well, where people really step into their life purpose. They really release a lot of emotional trauma and it just works in really amazing ways. It's a little too subtle for some people that are like, I want lightning to strike me right away.

Todd Measles

It's not a one and done because most of the people that we see, there's been issues going on for years like you and I have talked about. It's like an onion layer by layer that they need to work through. Whether it be physical or emotional issues, it works.

Dr. Wendy Myers

Yeah, there's a big emotional root cause of physical issues

Todd Measles

Right, and that's what we're trying to do. I think a large percentage of physical issues, the root is going to be emotional problems. And it's amazing. This thing can go back and emotional trauma that's in the subconscious as a kid, and I'm working with the adult, we can go back and help resolve those emotional problems.

Ads 00:08:25

For anyone listening that really wants to detox their body, go to heavymetalsquiz.com. I created a quiz for you. It only takes a couple of seconds, based on some lifestyle questions, you can get your toxicity score and get a free video series that answers all of your frequently asked questions about how to detox your body. Check it out at heavymetalsquiz.com.

Dr. Wendy Myers

I had a really interesting story. I was speaking with someone at an event for Discovering Hope. We're just all sitting around talking. I'm like, hey, let's do a NES scan on you, and everyone was into it. So we did a scan on this one speaker, and I said, "well, the emotional trauma coming up for you is biting." So being bitten or whatnot. And he just was like, what? He said, when I was 27, I was attacked by a pit bull and me and my dog were attacked and I had to kill it with my bare hands because it was going to kill me. Obviously it's still traumatizing and still that frequency was picked up by the NES Health software.

Todd Measles

Right, and then what we can do with that, and some people are ready and some people aren't, we can actually help them to bring that subconscious emotional trauma to the active mind so that they can think about it. Most of the time, it's going to be like, "hey there's nothing we can do about yesterday. All we can do is what's going on today and in the future." Then they can hopefully let it go and put it away. And it is not necessarily smooth sailing from there on out, but it's something that doesn't haunt them anymore, and we can help.

Dr. Wendy Myers

Yeah, and I think there are a lot of people that are looking for physical healing. They have a physical health issue, maybe it's diabetes, or maybe it's just their foot hurts all

the time, or whatever is going on with them. They have gut issues, and they think there's a physical remedy because obviously it's a physical problem, and usually addressing emotional trauma is like the last thing people are thinking of, or they just want to do something with that, but they don't really understand that it's a frequency based modality that's going to successfully address and release emotional traumas.

Todd Measles

That's right. Pretty amazing.

Dr. Wendy Myers

So anyone who wants to try NES or work with Todd, can go on myersdetox.com and look at programs. It'll be NES Health, and you can choose them as your practitioner if you want. It's a program I've been doing for, I guess, almost nine years now, eight, nine years, and I still do it. I still find that I respond to the program. There's a device called My Health that you can get. It sends frequencies to your body. It's really just an amazing program. They're always improving it and optimizing the software. It's just amazing.

You've also forayed into Spooky2 Rife. So Rife is a hundred-year-old technology. Again, it's like a frequency-based technology. So tell us what your experience was with that.

Todd Measles

That has really been a turnaround for our practice. We have a small office in little Petersburg, Texas, about 25 miles northeast of Lubbock. My wife is a massage therapist in one room, and then we do the Rife therapy in another room. And we've seen some pretty drastic, very good changes with some clients. What we can do with the Spooky, we can do a scan. It gives us the top 10 or top 20 frequencies that your body is saying, this is what I need. Even though you may not have symptoms, the body is saying, this is what I need first. And so then we can apply those frequencies in several different methods. We can work on specific areas of the body, or we can just work on the body as a whole. And we've seen some pretty amazing results.

I have a client with diabetes, neuropathy, and high blood pressure, and this is all we've done. This is the only therapy that she's doing. In about 10 sessions, her A1c has

gone from a 7.3 to a 6.7. So we're almost halfway there, right? You need to be 5.4 to be diabetes free. Her blood pressure has started normalizing. Her neuropathy in her feet is almost gone. I've also started incorporating reflexology. And so she was amazed the other day when she walked out. She's losing weight, and she's just amazed. And this is all verified by blood work.

I have a lady coming with breast cancer that had metastasized to the spine. She's been coming for a while. The one thing we have to keep in mind is to manage the detox issues, because if we hit them too hard, we can make them sick, or even more sick. She's pretty sensitive. She has gone down to MD Anderson twice. They have since reduced her daily chemotherapy. Her last report was that the cancer was still active in her body. Still there, but it was not active and so now she's still a client. I just found out yesterday that a prior client with breast cancer and the only therapy that she did was the rife therapy. She had five knots that were diagnosed as cancerous. They're gone and I asked her, are you doing any other type of therapy? And she said no. Just what you did. And I think she only maybe five or six times, seven sessions. I just found out yesterday.

Dr. Wendy Myers

That's amazing because I find that there really hasn't been any issue that I've ever had or treated in my friends and family. It just took a couple of sessions to address it successfully. Not everything gets fixed with it, but most of the stuff does, and that's why I've really talked a lot about [Spooky2 Rife](#) and the 65,000 programs that it has and the promise that it holds to really address so many issues. And for me, it's my little security blanket. I feel like I don't have to worry about anything. I'm not worried about anything at all.

Todd Measles

And what's really interesting is the really great unintended consequences. A client came last year for prostate issues. He did six sessions. He was doing other therapies, and then he went and had a biopsy. It was cleared. But here's another thing we're finding is that there's a dominant parasite in the body and we're able to deal with that. There could be dormant parasites in the body that can now thrive, and that's what happened with him, and he's not the only one that we've noticed. So he came back for a very bad nasal infection, and we're dealing with that, but just that, and I'm

not doing any kind of therapy to help this. This is just an unintended consequence. When he started in January, his hair was totally gray, and now he's got brown patches. It's turning his hair back brown, the right way it used to be.

Dr. Wendy Myers

I'm sure that's going to get a lot of people's attention, but I'm seeing newsletters from Spooky about how to reverse gray hair too.

Todd Measles

So, yeah, I can't explain it at all. It's just amazing what's happening, and these are actual people. This is people, because I always tell them I need to hear from you, okay? I need to hear what changes you're experiencing, good or bad. Most of the bad is going to be some kind of detox experience, where you might go to the bathroom a little more often for the first day or two after a session, and one of them is reporting feeling better.

Dr. Wendy Myers

What about the client that had rheumatoid arthritis?

Todd Measles

We're still working with her. Right now, life is pretty much catching up with her. She can't rest the way she really needs to, and she's one that's really sensitive. I mean, when a cold front blows in, she really feels it, the weather. She's one of those sensitive ones that we really kind of have to work with. And so, it has been a slow process, but she's still coming. We dealt with her lupus first. When she came in for her first session, she was walking with a walker. Now, she can get around her house without a walker and without a cane. Her pain issues are getting better. It's just a matter of whether we can get her to say no to some things like taking care of grandkids and let her body rest and heal. That's all we're doing. The only way the body heals is by itself. All we're doing is assisting. We have to have a certain amount of energy to get through our daily life, right? But to heal, you need that little extra energy, and we can help with that.

Dr. Wendy Myers

Yeah. I think when it comes to kind of any modality you're doing, energy is the name of the game. And what I love about Spooky is there's mitochondria boosting programs, there's sleep programs, there's detox programs, liver detox.

In fact, there's like an 11 day called a terrain protocol that essentially detoxes every detox system in the body. That's incredibly powerful that they recommend people do just to kind of clean out the body, get the detox pathways open, and then they respond better to the Spooky rife.

Ads 00:19:09

I want to give thanks to one of our sponsors, Caramel Collagen by Everbella. Collagen, as you know, is a very vital building block for our skin, our hair, our nails, our joints, and our bones. But, starting in our 30s, our collagen levels start plummeting. They start going on the decline. You know that we need collagen to prevent sagging and to give us that plump, youthful look, that glow. What you may not know is that most collagen supplements are full of toxins and fillers like glyphosate, arsenic and other heavy metals that actually disrupt your body's ability to regenerate collagen altogether. And that's why I love Caramel Collagen by Everbella. Not only is it rigorously tested to be free of toxic metals, but it uses a unique liposomal delivery technology to improve absorption, and it's absolutely delicious. I love taking this. I put it in my coffee in the mornings. You can try Everbella's Caramel Collagen for 30% off. Just head over to everbella.com and use code Wendy30 to get your discount.

Todd Measles

Yes, because as we start dealing with parasites, we need to make sure that the lymphatic system is moving. That's where my wife, Jan, can help with a lymphatic massage. We get to work together in that fashion. It's just been good. It's just been awesome.

Dr. Wendy Myers

Yeah, I know. It's very rewarding working with people using advanced technologies, like Spooky 2 Rife and like NES Health software to really see these transformations that you're not going to see using conventional relief and functional medicine because you have to get that underlying root cause. I think it's just so much easier

working in the body's energy field to, because what's giving direction to the physical body is the energy field.

Todd Measles

Yes, and with the NES health, we can tell things, and I use both, we can tell pH balance. We can tell vitamins and mineral imbalances. We can see metabolism. We can see the amount of energy in the major organs. We can see if they're talking to the rest of the body. And as we normalize that, things are just better off.

Dr. Wendy Myers

Yeah, I love how NES Health really helps to just optimize the body's overall functioning. It just gets the body working better, working optimally. That's what I use it for. And then the Spooky comes in and just knocks out all the infections, no matter what kind it is. It does emotional trauma stuff too. It does spiritual stuff, does all kinds of crazy things. But the name of the game is those parasites and those cooties that for a lot of it, and for a lot of these things, there's no tests. I mean, there's all kinds of infections, brain prions, and just all kinds of stuff. There's no medical test for these things, or they're difficult to test, or the doctor doesn't think to test it, or they're super expensive or not covered by insurance, or blah, blah, blah. And you don't have to think about any of that stuff. You're going to pick up the frequency of whatever cooties you have by doing this simple scan.

Todd Measles

And yes, just like yesterday, we can pick up cooties that had no symptoms. So they don't even know that there's something going on. It's pretty amazing. And then we turn right back around and we apply those frequencies and they cure everything. And then the next week, I do a scan and does it show up? Unless it's a pretty heavy, pretty bad situation.

Dr. Wendy Myers

Or sometimes you have a lot of symptoms, like when you eat bad tacos in Mexico, which was my case, and you have a lot of really bad symptoms and you can address this really, really quickly. Like for me, I just did 2 sessions and I was good. I didn't have any more symptoms and I suffered for like 2 weeks. And then I was like,

what? Because sometimes you just think GI stuff is just going to go away, you know, for like a day or two, but the GI system symptoms were not going away. And then I finally got up my Spooky and did it a couple of times and poof, gone. And it's really amazing how quickly it works.

Todd Measles

And it's totally non invasive. Most of the time, unless I have something kind of serious, we can use the plasma with the Spooky and kind of slam the parasite. But most of the time they come in and they lay between the scalar unit on a massage table and it's totally non invasive. They lay there and most of the time they just take a nap while they're in that scalar field and that we can send frequencies through and take care of issues.

Dr. Wendy Myers

Yeah, and when you say scalar, can you explain that a little bit because that's a component of the spooky, a little bit separate? The rife is kind of like a flashing plasma tube. It was embedded like a hundred years ago. And so it's been around a long time, tried and true. It's kind of a flashing light bulb, your little disco ball you're sitting in front of. And then the scalar, explain what that is exactly.

Todd Measles

What we have is a translator and a receiver, and we tune it to each other and it creates this, just the scalar feel itself just laying in it is very beneficial. Just being there, my handwriting is getting better. It's still bad, but it's getting better and I don't know why. I don't know if it's like a motor function, whatever, or maybe I'm able to concentrate better, but it's just unintended consequences of being around it. People who are really sensitive to frequency. I just had a client who is so sensitive. She can actually hear electricity running through the walls to the outlets in her bedroom. She turns the breakers off so she can go to sleep. That's sensitive. But she was able to do the scaling. And so we're working with her. I've looked up what scalar is and I haven't found just a whole lot of information. The only thing I can tell you is that it's a more gentle way of introducing the frequencies and people love it and it's working.

Dr. Wendy Myers

When I think of Scalar, I think of information that's traveling on the scale or energy waves. There are different types of energy waves. When you think of your Internet working, your WiFi, that's information packets traveling on energy waves. That's your cell phone information traveling on energy waves. Your body works the same way. Your brain and your heart all work the same way - emitting energy fields with information on them. The scalar is just sending new information on scalar waves. That's just all that is, which is essentially information in the form of different frequencies, different Hertz frequencies that it's sending to your body. And what about your own experience? You've told me a lot of things about changes that you felt in doing this work on yourself and kind of as a bystander or working with clients. What kind of changes have you seen and felt yourself?

Todd Measles

Well, I know my hair is blacker than it's ever been.

Dr. Wendy Myers

I am going to be 52 in about a month. I've never had any gray hairs. So I've been doing Spooky, I guess since 2019, 2020, and I've been doing NES Health for eight, nine years and I didn't really think about it. I thought, oh, it's just my genetics, but it may very well be the Spooky and working with that for so many years.

Todd Measles

I believe it because it was so funny that a guy came in and he goes, you notice anything different? I was writing something. I looked up and said, are you losing weight? He goes, no, don't worry about my weight. He said, no, look, he pulled his cap up. He said, look, and turned around.

Dr. Wendy Myers

You're going to get people coming to you just for that alone, just for that symptom relief alone. But I recently watched one of the Spooky webinars and it was about diabetes. The guy had type one diabetes since he was a child, very, very severe. Within a few months of using Spooky, he reported his A1C went from like 7.3 down to 6.0 in a few months and over a little bit longer course of time. He lost 35 pounds, just

as you know, his blood sugar was being controlled and regulated correctly, and he did a whole webinar on it.

The Spooky has a Facebook group that's almost 80,000 people now. And there's over a hundred thousand Spooky users around the world and just unbelievable stories like the stories you're saying right now. It's just really warms my heart because I really want people to have a sense of security, to not live in fear, and to have that control in their own hands to take control of their health and their longevity and live a high quality of life.

That's my only hope, you know, after watching my own father pass away from his cancer treatments and watching him suffer for years and not really getting any relief and it's just so sad. And there are so many people listening that have had family members die in that way and lived a very low quality of life their last few years. I just really want people to know about these technologies and know that there's so many things that they can do. They're not being suggested to them or told by to them when they're going to their conventional or even functional doctor. I don't want people to be limited by their tool set or their knowledge set. There's always something that you can do no matter what is going on with you. There is always hope. There's always a way to address it. You're just talking to the wrong person

Todd Measles

Quite a few clients and don't get me wrong, if there's a need for functional medicine or doctors, I always have to refer back to their doctor if I see something that looks suspicious. But a lot of the clients that I've had when they've been to the doctor, and the doctor tries this medication, and this medication, and this medication, and it's not helping. And the doctor goes, "I don't know what else to do for you". And so that's when people start looking for alternatives, and obviously I'm going to recommend that they look into energy work.

Ads 00:30:24

I want to give thanks to one of our sponsors, Glutaryl Transdermal Glutathione Spray. Glutathione is essential for detoxification and to promote energy, cleansing and overall wellbeing. Auro glutaryl is the groundbreaking topical glutathione spray that's

about to become your new wellness essential. Glutaryl delivers glutathione on demand through a multi-patented sudden nanotechnology, challenging the IV and the liposomal delivery systems currently on the market. Glutathione is key to balancing oxidative stress and free radicals and promoting longevity. Add glutaryl to your longevity routine this year by visiting aurowellness.com, that's A-U-R-O wellness dot com and use code WENDY5 to get 5% off your first order.

Dr. Wendy Myers

Energy medicine is a medicine of the future. It is and it works. Period. And I'm all for it. I'm all for conventional doctors. I go to see doctors for my hormones and there's an emergency. Yes, absolutely. I want to go to a hospital if I have an emergency or a car wreck. Emergency medicine is unbelievable. But I think the problem is the chronic care. And maybe how certain health issues are addressed. There are just better ways to go about things, but I think everyone has their own process. They have to go through their own healing journey and make their own choices in their health care. But for me, I just want to open people's eyes to all of the different options that are out there, and things that are not being talked about or suggested to them. I wanted to go back to your own healing journey and talk about what surprised you doing this type of work and how you feel today versus before you started a few years ago.

Todd Measles

My journey started when my wife Donna was diagnosed with lung cancer. Her first diagnosis was stage four and I knew nothing about this energy work that could have benefited her. You were there and you were helping. She was just a little too advanced and so she was with us for about another three months, I think, after that diagnosis. And so, after that, you guys suggested that I might look into this. So I did certification. I think the biggest thing that benefits me is that it gives me a purpose to help people. I think that has been the biggest thing that I've come to realize. It is certainly by doing the therapy for myself. It has certainly pulled me out of depression from having that experience and it's just been a wonderful thing that you and I have been able to share.

Dr. Wendy Myers

Yes, I saw that healer in you and I just thought it would be perfect for you to start learning about NES Health and then getting a Spooky and start learning how to use that and whatnot. And it's just such a beautiful thing to see cause I wanted to tell a little bit about our story that our mom had you and wanted had to give you up for adoption. She was young and it just wasn't the right timing for her. In our whole lives, we looked for you. We wanted to know you and whatnot. There was really like a big hole in her heart, not having you in her life – just a deep wound. She was really wanting you in her life.

I did a 23andMe, like right when it first came out, the whole genetics thing. It was in early 2000s or something like that. I did a 23andMe test and then your adoptive sister got one for you. I don't know why, but I put in, don't put me in the family gene. I don't know why I don't allow people to contact me. I don't really know why I thought, oh, I need to be private with this. So I didn't, I don't know why, but when you did your test, you saw that you had a half sister and you found me on there.

Todd Measles

Yes, it was a birthday gift from my wife Donna and my own stepdaughter. I did the test and took about a month to get back and all that until December. This has been almost seven years now, or maybe more than seven years. So I got the notification and went to the website. I was a little apprehensive about going to like the DNA relatives. I went through all the medical stuff first, but then I went over to DNA relatives. And right there on top of the list said, I had a half sister, but your name was unknown and I was like, oh, man.

Dr. Wendy Myers

Yeah. I made a private. I don't know why. I was trying to protect my DNA from the Chinese or something. I don't who I was trying to hide from

Todd Measles

And so, of course, at that point, I didn't know whether our mother was still with us or not, but I thought about it for a while, and I thought when it all boils down, the only thing you're gonna have left is God and family. So I started looking into the process and went back through the adoption agency and stepped through all the hoops and

requirements that they had. So I'm on a tractor one day, I get a text, and it's from our mother. It was her married name. I thought it was spam or scammer or something, and it's like, I want to talk to you later. And so it took me a while, and I figured out. I texted her back and I said, I'm working, but I'll call you back here in a little bit. On the way home, I called her and we had a three hour conversation and it has been awesome ever since. I know I'm blessed. A lot of adopted children, when they try to make that connection, it's not good.

Dr. Wendy Myers

I have a friend that tried to make a connection with her real father and just did not work. It fell on deaf ears. It's really heartbreaking.

Todd Measles

Right. But this has been awesome, and I've got to know her, I've got to know you, and I'm so thankful.

Dr. Wendy Myers

Yeah, I am too. When we put our paperwork into the Texas Adoption Agency, I don't know why I thought we were going to get a response like really quickly. I thought that, oh, he must be looking for us too and we would just get connected. And then it took a long time, but I'm very thankful it happened when I was in my forties. I was like, I guess about 45 or so 44 at the time and I put about it in my newsletter to the people that were tuned in at that time. I had always been an only child. So I was really thrilled that I was able to finally meet you. My mom told me about it when I was about 17 when she felt like I was kind of emotionally ready to handle that information. I'd always grown up alone. So I was really happy to learn that I had a brother, and you've been amazing. You have so much heart and are so spiritual and intelligent, and just such an authentic, genuine person. So it's just been wonderful getting to know you. I love that we kind of connect and bond over energy medicine also, and call each other and talk about this or that or troubleshoot something or just bounce ideas off each other. And it's great, and I love that you're helping people and that you're available to help people on their healing journey.

Todd Measles

I am available, yes. Our practice is growing. I think I'm gonna have to start expanding and buying more equipment. And then Jan, my wife, is actually learning how to use the Spooky also. And so we've got plans in that direction to be able to help more people.

Dr. Wendy Myers

Great, and you do detox foot baths also. You're doing all kinds of stuff. So if someone wants to work with you, how can they get in contact with you? What's your email or phone number?

Todd Measles

Probably the best way to contact me is through email, and it's Todd, T- O- D- D, dot, measles, M E A S L E S, just like the red measles or the German measles, at MyersDetox.com (todd.measles@myersdetox.com).

Dr. Wendy Myers

If Todd's message resonates with you and you want to fly out to Lubbock or near him, or you can work remotely with people as well, just shoot him an email at todd.measles@myersdetox.com. Todd, thanks so much for coming on. Is there anything else you wanted to tell the audience?

Todd Measles

Yes, it works, and you had the biggest part in this helping me get going and mentoring me. It's just been awesome. I'm saving. I'd love to help you.

Dr. Wendy Myers

Fantastic. Well, Todd, thanks for coming on the show. Everyone, I'm Dr. Wendy Myers. Thanks for tuning into the Myers Detox podcast every week and I'm so happy you guys got to meet my brother. He's my big brother, and just thrilled that he is out there in the world helping other people to get better and step more into their life purpose and to heal them and help them on their healing journey.

And so anyone needing some little TLC from my big brother, you know where to contact him and you can go get tons of free resources, hundreds, over 500 podcasts. Well, I think we're at, you know, 400 articles now, all free on myersdetox.com. I would

love to provide free resources for people to help point them in the right direction of getting those last few puzzle pieces they need to meet their health goals and live their best life.

Thanks for tuning in, and I'll talk to you guys soon.
